WORK EXPERIENCE

Odoo Developer2023 - PRESENT

- Delivered customized Odoo solutions across ERP, Website, eCommerce, and POS, enhancing efficiency for retail and restaurant businesses.
- Designed and implemented workflows for Inventory, Sales, Purchase, and Subscriptions; contributed to both frontend and backend development.
- Collaborated with cross-functional teams to understand requirements and deliver user-friendly, integrated Odoo systems.

PROJECTS

Mechpower Technology

- Developed a responsive, SEO-optimized corporate website with custom features like "Instant Quote" and 3D model visualization using Odoo Website and eCommerce modules.
- Customized and integrated Odoo modules (Inventory, Sales, Purchase, Subscriptions, POS) with manufacturing processes (CNC, 3D printing, injection molding) to streamline operations.
- Collaborated cross-functionally with design, engineering, and sales teams to align website functionality with backend ERP workflows.

DataTile - Research Intelligence Platform Development

- Built on Odoo with a responsive design, featuring dashboards and statistical tools for real-time insights and in-depth analysis.
- Expanded functionality with newsletter and contact management to enhance communication and engagement.
- Ensures a secure, collaborative environment through CRM/ERP integrations and compliance with ESOMAR standards.

Mahri Logistics - Website Redesign

- Redesigned the website using Odoo Website Builder, enhancing UX, mobile responsiveness, and visual appeal.
- Aligned layout and content with brand identity through close collaboration with design and marketing teams.

Lightspeed R-Series – Odoo Connector Development

- Developed a custom Odoo-Lightspeed R-Series connector to seamlessly import and synchronize POS data into the Odoo system.
- Automated data flow for sales, inventory, and customer information, ensuring real-time accuracy across platforms.
- Enhanced operational efficiency by eliminating manual data entry and enabling unified reporting and analytics.

LabMart Limited – Odoo ERP & E-Commerce Implementation

- Developed a full-featured e-commerce platform using Odoo Website and eCommerce modules to showcase and sell LabMart's lab products online.
- Implemented and customized Odoo modules (Sales, Purchase, Inventory, Accounting, Payroll, POS) to streamline end-to-end business operations.
- Configured multi-company support and provided ongoing maintenance to ensure stability and scalability across multiple locations.

Aljihad Company – E-commerce Store Development

- Built a responsive Odoo-based e-commerce store for home appliances, with customized catalogs, pricing rules, and promotional features like discounts and coupons.
- Integrated secure payment gateways and shipping options to streamline the purchasing process across devices.
- Managed backend workflows including inventory, sales, and order processing for efficient store operations.

Roger Capital and Clavish Technology – EBS Integration for MRA Portal

- Integrated the EBS (Electronic Banking Services) payment gateway into the MRA Portal to enable secure online payments using credit/debit cards, mobile wallets, and net banking.
- Enhanced the system to support real-time transaction processing and reconciliation across the portal and POS (Point of Sale) environments.
- Customized APIs to ensure smooth integration between the EBS platform, the MRA Portal, and backend systems.

SF Sign Supply – Odoo E-commerce Website Development

- Developing and optimizing an Odoo-based e-commerce platform for SF Sign Supply, focusing on performance, SEO, and user experience.
 - Customizing product catalogs, pricing, inventory workflows, and integrating secure payment and shipping solutions.
 - Refactoring backend code for scalability and collaborating with stakeholders to ensure alignment with business goals.
-
